

ASSET OPTIMISATION SOLUTION

Noriker's electricity supplier subsidiary, Equinicity, operates as a full-service Asset Optimiser.

Equinicity's optimisation team combines the use of advanced algorithms, with our 24/7 manned trading desk, backed up by our electricity market analysts. Our comprehensive range of trading tools are under continuous development, supported by Noriker's in-house IT team.

Equinicity was shortlisted for the Energy Storage Awards Trading and Optimisation Team of the Year 2024

Equinicity consistently outperforms market standards in the ancillary services, day ahead and intraday markets; for example, beating the BESS 1hr industry benchmark by over 45% in the year to June 2024.

Combined with the technical support and BESS knowledge from Noriker's project engineers, Equinicity has a truly unique and holistic BESS optimisation proposition, that includes better safeguarding of battery health.
